ENGINEERING DESIGN & SUPPORT STAFF LOGNOTE

5 FEBRUARY 1981

3. LONDON [] CONSTRUCTION []

STAT

I called [] C/Foreign Branch/RE&CD, to reconfirm a previous conversation I had with [] C/Field Engineering Branch/RE&CD concerning the London [] Construction project. [] had told me back in October that his branch need not become involved with the [] Construction in Caversham since it was being handled by the BBC according to their rules and regulations. Since we are about ready to sign all the papers on this project I wanted to touch base with RE&CD once again. I told [] the BBC Architectural and Civil Engineers will in effect be in charge of the construction and we, FBIS were just supplying the money. He said that he saw no problem with our proceeding and he would mention it to [] who was out of the office this afternoon. I also mentioned to [] that the money involved putting up fences, trees, etc., all in accordance with the local zoning regulations. He seemed satisfied that we were handling it properly.
